Abstract (en)

[origin: WO2006109241A1] The present invention relates to a flavour and skin sensation composition providing a hot or warming sensation upon consumption or application, respectively. The composition comprises a hot, warming component, a cooling component and a bitter component. In an embodiment, the composition further comprises an acid component. The composition provides a clean hot taste free of oily or earthy off-notes. Consumers prefer the composition over hot, warming compositions comprising essentially natural extracts.
