Abstract (en)

[origin: WO2006111199A1] A micro-porator (10) for porating a biological membrane (1), comprising: a) a controller (11) b) an initial microporation dataset (D); c) and an ablator (10a) for creating a microporation on the biological membrane (1), the controller (11) controlling the ablator (10a) based on the initial microporation dataset (D), to create the microporation as defined by the initial microporation dataset (D).
