Abstract (en)

[origin: DE102005017755A1] The machine has a labeler for attachment of a transponder (4) to a plastic package (2) and an antenna for data exchange between the transponder and a computer-and/or control unit. Data are transmitted to the transponder and are accessed from the transponder by the antenna. The package has a deep-drawn packaging tray (17), where packaging goods are inserted into the tray that is closed with a cover film (7).
