Abstract (en)
[origin: WO2006115425A2] An upper cap 1 has a thread 5 to engage with a thread 7 of a container cap closure 6. The upper cap 1 provides a receptacle in which any required commodity can be contained such as a novelty car as shown. Clockwise or counter-clockwise rotation of the cap 1, shown as 2 or 3, can selectively remove the cap 1 without or with the cap 6. A plurality of caps 1 may be connected together to form a vertical stack.
