Abstract (en)

[origin: DE102005019150A1] The method involves controlling of door (2) within its force limits in that a value measured by at least one acceleration sensor which measures an acceleration of the rail-mounted transport means (3) or by an inclination sensor which measures the gradient or inclination (beta) of the rail-mounted transport means is analyzed. An independent claim is also included for the rail-mounted transport means.
