Abstract (en)

A lighting functional section, which lights an object which is using a mirror by facing, is mounted on a mirror main body normally used. The lighting functional section is a lighting apparatus which uses irradiating light of a light emitting diode. The light emitting diode for lighting is mounted on a mirror glass in accordance with the size of the mirror or using purpose of the mirror. The mirror mounted with light emitting diode lighting has the function of lighting the object facing the mirror.
