Abstract (en)

[origin: EP1876349A1] An Injector assembly for an injector (2) comprises a double-tube-shaped fluid pipe (21) and an injector cover (24). The injector cover (24) has a fluid connection (30) of the injector (2) and a fluid line (32) of the injector cover (24). The fluid line (32) of the injector cover (24) communicates with the fluid connection (30) of the injector (2). The injector cover (24) is at least partly arranged in the double-tube-shaped fluid pipe (21), wherein the relative axial position of the injector cover (24) to the double-tube-shaped fluid pipe (21) corresponds to a given calibration of the injector (2).
