Abstract (en)

[origin: WO2007045227A1] The invention relates to an airbag module for a motor vehicle, comprising an airbag which may be inflated to protect a person, at least one outlet opening from the module for the at least partial release of gas from the inflated airbag and a reservoir with coolant therein for cooling the gas released from the module through the outlet opening. According to the invention, the reservoir (9; 32; 58; 72) has a defining wall (16; 38; 74) which completely encloses the coolant and which can be opened for cooling the released gas such that the coolant comes in direct contact with the released gas.
