Abstract (en)
[origin: WO2006114427A1] A method is disclosed for producing an amine by reacting an aldehyde and/or ketone with hydrogen and a nitrogen compound selected from the group of primary and secondary amines in the presence of a heterogeneous catalyst. The catalyst is a catalyst package that can be produced by applying at least one catalytically active metal and/or at least one compound of said metal to a woven or knitted fabric or to a film as support material.
