Abstract (en)

[origin: WO2007063368A1] The present invention relates to a household appliance (1), in particular adapted to carry out at least one wash treatment on textile items, comprising a rotating drum (3) adapted to contain the textile items to be treated, and at least one element (9) adapted to drag and/or lift the textile items during the treatment. According to the present invention, said element (9) comprises means for containing washing and/or additive agents.
