Abstract (en)

[origin: WO2006117232A1] The invention relates to a device for protecting an object from shaped charge jets. Said device comprises an electrode array with at least one electrode (3) facing the object and at least one electrode (2) facing away from the object, a voltage being applied between the two electrodes. The invention is characterized in that the electrode (3) facing the object comprises at least one area with a spatially heterogeneous electrode material.
