Abstract (en)

[origin: WO2006117124A2] The invention relates to a method and system for correcting programming and optimising treatment and/or subsequent treatment processes in technical installations, in particular in the paper industry, wherein the system comprises means for carrying an optimisation suitable for treatment processes and for corresponding subsequent treatment processes according to a production plan (18) defined by processing qualitative data (13) and/or information related to the quality of at least one starting product of an advanced production stage.
