Abstract (en)
[origin: EP1878364A1] A double-decked baby bed (1) comprises: a folding bedstead (10); a plurality of soft fabric layers (11) disposed around the bedstead and on the bottom of the bedstead; a folding bedplate (14) for detachably attaching to the bedstead; and two plates (12,13) for detachably attaching to the fabric layers (11). The fabric layers (11) have a plurality of coupling parts (112) on opposite short sides. The plates (12,13) have a plurality of coupling parts on opposite short sides (121,131) corresponding to the coupling parts (112) of the fabric layers (11). As a result, the height of the folding bedplate (14) is adjustable by connection or disconnection of the plates (12,13) when the folding bedstead (10) is unfolded.
