Abstract (en)
[origin: EP1878508A2] The shower (10) has a water distributing chamber (24) with a central water inlet (18) and a set of water discharging openings (38), where the chamber has two sheet metal plates (26, 28), which are sealed at its external edges (30, 32). One of the plates (26) has a central feed-through for the inlet and the other plate (28) has the discharge openings, where the inlet has nozzles (20) extending into the chamber. The nozzles have an enclosed base and radial water inlet boreholes (22) in such a manner that the nozzles act as a throttle valve, where the boreholes discharge into the chamber.
