Abstract (en)

[origin: EP1878513A2] The cell has a base area, a center area and a head area and the base area has an opening, by which a lever stopper bottles (2) is inserted in the bottle cell. The internal diameter of the bottle cell increases fractionally in the centre area towards the head area. The bottle cell has round cross section in the center area. The partial bar (10) is fixed at the internal wall of the bottle cell and determines the internal diameter. An independent claim is also included for a cleaning machine for cleaning lever stopper bottles.
