Abstract (en)

[origin: DE102006032922B3] The device has a sheet stripping device (8) comprising a sheet stripping unit (10), which is movably arranged in a sheet running direction such that it anticipates the front edge of the subsequent sheet to be turned, which is guided along a guiding scrapper, and scraps the preceding sheet on the periphery of the guiding scrapper. The sheet stripping unit is a wedge-shaped unit. The sheet stripping unit is arranged on traction unit (9) and is movable in a sheet guiding direction.
