Abstract (en)  
[origin: EP1878589A1] The invention relates to a method for producing an information page (1) for a security document, said method comprising: producing an information part (3) for said information page, and producing a flexible and bending resistant attachment part (2) by utilizing a material (5) having a net-like structure, and attaching said attachment part to said information part (3). In order to obtain an information page with desired properties said material (5) having a net-like structure is, during manufacture, supported by attaching (D) a support layer (6) to the material (5) having a net-like structure.
