Abstract (en)

[origin: EP1878837A1] The wall mounting for a shower rod has a holder block (16) fixed to the wall. A sliding shower rod holder (18) is at the holder block, with a holder zone (20) at the end (22) towards the wall to take the holder block and a passage opening (26) at the other end (24) to take the shower rod (12). A guide groove (14) at one side (38), between the ends, takes the shower hose with a projection (36) to hold the hose in place. The hose retaining projection reduces the opening of the groove to smaller dimensions than the hose diameter.
