Abstract (en)

[origin: EP1878846A1] The cage has longitudinal wires (10) made from concrete reinforcement steel and connecting a hairpin-shaped bracket with side pieces (16, 17), where the wires are arranged parallel. Transverse wires intersect orthogonal to the longitudinal wires, and a bottom rod stands right-angle to the bracket. A connecting plane parallel to a plane comprising the bottom rod limits a bottom section (8) of the cage, where the bottom section is arranged in an area of a bottom plate. A wall section (9) for arrangement in a wall area (2) is provided against middle sections of the bracket.
