Abstract (en)

[origin: EP1878863A2] The structure has a window frame (1) and a window sash (2), which is made of a framework (3). The framework has a plastic hollow section, connected in the corners, where a veneer wall (10), made of an aluminum profile section (7), is mounted by sticking. The veneer wall has a prefabricated framework (6), held together by a corner link (9), which is also made of the aluminum profile sections. An aluminum profile (8) is L-shaped with a clear height, which has a dimension at a distance (D), higher than a height of a plastic hollow section.
