Abstract (en)

[origin: EP1878867A1] The door has a support (3) with a wing (4), which is arranged by a swiveling part (5), pivoting around the support. The door has a closing device and a locking device (9). The locking device has a socket, a spring device (9.2), a locking tool and an adjusting ring (9.10). The parts of the socket, the spring device and the adjusting ring, are arranged outside the support. The socket has multiple devices, where the spring device is designed above the socket. The spring device has an elastic spring material.
