Abstract (en)

The invention relates to a label, comprising a top sheet and a bottom sheet. The bottom sheet has a bottom surface and a top surface. The bottom surface of the bottom sheet is provided with a self-adhesive layer for sticking to a substrate. The top sheet has a bottom surface and a top surface. The top sheet is stuck to the bottom sheet with the under side facing downwards. The top sheet has a first tear line and a second tear line, which are located at a distance from one another. That part of the top sheet which lies between said tear lines forms a removable part which can be torn off the top sheet by tearing along the tear lines and can thereby be removed from the label. A release layer is located between the removable part and the bottom sheet, to which release layer the removable part is releasably bonded by a self-adhesive layer provided on the bottom surface of the removable part. The release layer is permanently attached to the bottom sheet.
