Abstract (en)

[origin: WO2006120468A1] A merchandising/display element for a merchandising/display system is in the form of a shelf (10) having a rear part (11) and front part (12), the parts being interengaged with the front part being slidable backwards and forwards relative to the fixed rear part to vary the shelf depth/length. Moreover the width of the shelf is also adjustable by means of slidable wire slides (21,22;32,33). The adjusted front part can be locked in position by detents (31) thereof engaged by grips (29, 30), whilst the adjusted wire slides can be locked in position when adjusted by lock bars (34, 35) with detents (42, 43).
