Abstract (en)

[origin: WO2006120327A1] A post office box (2) including an enclosed space (3) defined by a front surface (7) with an opening (20) fitted with a sealing device (21) that includes a first sealing element (31) movable between an open position in which the inside of the space is accessible via the front opening, and a closed position in which the front opening (20) is substantially sealed, and further includes a locking device (50) for locking the first sealing element (31). The box (2) comprises a locking element (41) movable along a rear surface (8) and connected to the first sealing element (31) via a connection (49) for transmitting a movement proportional to the movement of the first sealing element (31), said locking device (50) being mounted on the rear surface (8) and engageable with the locking element (41). A post office box system (1) including a plurality of such boxes is also disclosed.
