Abstract (en)
[origin: WO2006119599A1] A pouring lid for cans of the type comprising a tubular body (10) having an annular upper wall (12) which presents an inner face (12b), an opening (13) and having any point of its inner face (12b) positioned at a height in the interior of the tubular body (10), at minimum equal to the height of another point of said inner face (12b) positioned radially externally. A pouring lid (20) is removably fitted and retained in the opening (13) and comprises a closing wall (21) provided with a median opening (21a) and externally carrying a tubular projection (27) generally provided with an obturator (30), any point in the inner face of the closing wall (21) of the pouring lid (20), when mounted to the can, being positioned at a height, measured in the interior of the tubular body (10), at minimum equal to the height of any other point of the inner face (12b) of the annular upper wall (12).
