Abstract (en)

[origin: WO2006108965A2] The invention relates to novel compounds, to the preparation and use thereof, in particular therapeutic. Said invention particularly relates to derived compounds comprising at least two aromatic cycles, to the preparation and use thereof, mainly for human and animal health care. Said compounds exhibit an affinity to biological receptors Y and NPY of a neuropeptide Y which are present in the central and peripheral nervous systems. The inventive compounds are preferably embodied in the form NPY antagonists, and more particularly in the form of NPY Y1 subtype antagonists and, whereby are usable in therapeutic or prophylactic treatment all NPY involving disorders. Pharmaceutical compositions comprising said compounds, the preparation and the use thereof and treating methods using said compounds are also disclosed.
