Abstract (en)

[origin: WO2006117381A2] Methods for the targeted transgenic expression of nucleic acid sequences in the flower tissues of plants are disclosed, as well as transgenic expression cartridges and expression vectors which contain promoters with expression specificity for flower tissues. Also disclosed are organisms (preferably plants) transformed with these transgenic expression cartridges or expression vectors, cultures, parts or propagation elements derived therefrom, and their use for producing foodstuffs, feedstuffs, seeds, pharmaceuticals or fine chemicals.
