Abstract (en)
[origin: WO2006120099A1] The invention relates to a refrigerator body, comprising a deep-drawn inner container (2) that defines an inner chamber of the refrigerator body, and an external skin (1) that encloses, together with the inner container, an intermediate space (3) filled with insulating material. A groove (7, 8) is deep-drawn at one wall of the inner container (2). An air duct which extends along the groove (7, 8) is delimited by a covering plate (11) from the inner chamber of the refrigerator body.
