Abstract (en)

[origin: WO2006117387A1] The invention relates to a chip (100) provided with a microprocessor (101) in a motor vehicle, wherein said chip comprises an interface element (106) for connecting to said microprocessor, the chip also comprises other elements (102-108) which are additional to the interface and monolithically integrated into the chip for carrying out different automobile specific functions and electronic power output stages for actuator are arranged outside the chip
