Abstract (en)

[origin: WO2006121248A1] A data broadcast receiver, and an apparatus and method of displaying data broadcast contents in the data broadcast receiver, where the method includes: receiving application contents for a data broadcast; obtaining system information of the data broadcast receiver; reconstructing the application contents on the basis of the system information; and displaying the reconstructed application contents. Therefore, it is possible to display and execute application contents without causing user confusion in a data broadcast service.
