Abstract (en)
[origin: EP1880651A2] The nozzle (1) has an adapter (5) provided for processing surfaces having different properties, where the adapter is connected with the nozzle by a swivellable axis (4, 4'). The adapter is swivellable from a resting position distant from a sucker (3) into an operating position in front of the sucker. The adapter is detachably locked in the operating position, where the axis is designed as a two-piece and a part of the axis is changeable in position.
