Abstract (en)
[origin: EP1880851A2] Cleaning device comprises a pressure pad having a cross-section with a central region (10) which is convex in the direction of a cleaning cloth. The pressure pad is formed as a spring element in the central region and/or at the transition from the central region to the edge regions (12, 14). Preferred Features: The thickness of the pressure pad is reduced in the convex region opposite the edge regions connected to a cleaning bench.
