Abstract (en)

[origin: EP1880942A1] The coupling fastener (1) has a fastener strip (5) with an end and another end in longitudinal circumference, and an installation position (23) with a fastening element (19). Another installation position (25) has another fastening element (21). A supporting side has a third fastening element coupled with the fastening element reversibly, particularly sealed from environmental influences. The fourth fastening element is coupled with the former fastening element reversibly, particularly sealed from environmental influences. Independent claims are also included for the following: (1) a docking device particularly for emptying, filling or refilling of bulk cargo without environmental influences (2) a method particularly for emptying, filling or refilling of containers without environmental influences.
