Abstract (en)

[origin: EP1880962A1] The method involves transporting values of processing parameters from a data medium to a controller of a processing machine e.g. pre-press device, or from the controller to a data medium, where the data medium exhibits an electronic storage medium. The data medium is brought together with a stack of arc-shaped copies of a printing medium e.g. paper, within the processing machine in such a manner that an automated data transmission takes place into the controller or from the controller. Independent claims are also included for the following: (1) a stack of arc-shaped copies of a printing medium (2) a method for processing arc-shaped copies of a printing medium.
