Abstract (en)
[origin: EP1881102A2] The frame includes a holder for clothes hangers (2) with two limbs (3, 4). This can be folded down, or raised. One limb supports clothes hangers (4), the other is a supporting section (3). They are hinged (10) together. The supporting section unfolds to an upward- or vertical position, with the holder for clothes hangers in a horizontal position. The holder rests on the supporting section when folded down. They nest together. Either or both have a hollow profile, especially a semi-tubular profile with corresponding internal and external diameters. The holder for clothes hangers is hinged (11) to the main frame using one or two hinges. The hinges are attached to a rail, rod, drying rod forming part of the drying rack, and/or a supporting leg of the frame. The supporting section (3) has a semi-tubular profile, its internal diameter matching an external diameter at the location of attachment. Further details of the stand and alternative configurations are provided, The frame folds together compactly.
