Abstract (en)
[origin: EP1881124A2] The lightweight construction board (1) comprises discs (3), where the recesses (2), in a side surface of adjacent disc, form cavities (34) in the lightweight construction board. The longitudinal side (6) of the disc has two recesses separated, from each other, by a bar (9). The bar is arranged at a distance from the longitudinal side of the disc, where the bar extends over the length of the disc. The filling material in cavities is plastic, particularly polyurethane foam.
