Abstract (en)
[origin: EP1881131A2] The device is designed for fixing a base such as a cover plate (1) of an urn niche and has bores for feeding through fixing elements, whereby the base is fixed to the urn niche by pin-shaped fixing elements and bores. The bores of the guide rail are positioned so that they coincide with the bores when the rail is applied to the base. The fixing elements of the guide rail are identical to the guide elements of the base. An independent claim is also included for a cover plate for an urn niche.
