Abstract (en)
[origin: EP1881134A2] The cylinder lock has cylindrical cores (4,5) and connecting bridges (7). The connecting bridges have multiple passages (12) or a long hole (13) in the area of the connection with a crosspiece (9). Multiple passages or the long hole are aligned with a bore (14), particularly a thread blind hole in the crosspiece, for a connecting element (15) and the closing latch (6) is formed as hollow cylinder (11) beside a lock lug (10). The cylindrical cores or a cylindrical part protrudes into the hollow cylinder.
