Abstract (en)
[origin: EP1881139A2] The lock (1) has a lock case (2) with a recess (9) for a closing bolt, and two rotating latches (13) rotatably supported in the lock case. The rotating latches stand in connection with a rotating latch spring, and a pivotable locking unit is arranged in the lock case. A rotating movement of the rotating latch is locked by the locking unit such that the lock is locked. An actuating mechanism for actuating the locking unit has a drive unit, which has a drive section for a manual actuation of the actuating mechanism using a screw wrench or a screw-driver.
