Abstract (en)  
[origin: WO2006120056A1] The invention relates to a cupboard-type domestic appliance the housing of which comprises an interior in which a support can be displaced between a retracted and a pull-out stop position by means of a telescopic pull-out mechanism (48, 49). Said mechanism comprises a first runner (50) fastened on the housing and at least one second runner (53) that can be displaced in a direction contrary to that of the first runner. The invention is characterized in that a projection (59) of the second runner (53) is coupled to a self-retracting mechanism (61, 62) mounted on the housing at a distance to the runners (50, 53).
