Abstract (en)  
[origin: WO2006120074A1] An arrangement of telescopic extensions, in particular for a refrigerating device, comprises two telescopic extensions and a movable part (5) carried by the telescopic extensions, such as a door or carrier for refrigerated goods. Bridges (12) are mounted on movable rails (7) of the telescopic extensions (6) and delimit, together with the movable rail (7), a gap (25) for receiving a first tongue (13) of the carried part (5). The width of the gap (25) is larger than the thickness of the first tongue (13), and a second tongue (21) is inserted into the free space remaining after the first tongue (13) is inserted into the gap (25).
