Abstract (en)

[origin: EP1882796A1] The basin (1) has flexible/rigid panels held and fixed on a self-supporting structure, and forming peripheral walls and bottom of the basin. The structure has a floating part including modular floats and an immersed part with ballast forming side rails (15) to emerge/float the basin on a water surface or stream (2). The immersed part has a vertical peripheral structure (14) surmounting a horizontal structure designed in the form of a raft. An independent claim is also included for a mounting method for watering a floating basin.
