Abstract (en)

[origin: EP1882806A1] The hub (7) has a retractable stop (13) to occupy an active position, where the stop cooperates with an end fitting (17) to stop a winding of an apron at an end of raising course of the apron, and a removed position, where the stop permits the passage of the fitting. The fitting is connected to an edge of horizontal plates (3) of the apron. The stop is made of steel wire and has a rod (14) engaged in a housing. The rod has an offset part (15) located in a plane passing through a geometric axis of the rod and cooperated with the end fitting to stop the apron in the active position.
