Abstract (en)

[origin: WO2006122859A1] The invention relates to a housing element for a portable tool, which consists of at least two types of material (PA, TPE) and includes an information-carrying identification element (10). The invention is characterized in that the identification element (10) produced of a first type of material (PA) engages through an area (12) produced of a second type of material (TPE).
