Abstract (en)
[origin: WO2006125239A1] The invention relates to an locating device for an ink-jet printing device (1) for various printing media (2), comprising a printing head arrangement (3) with at least one printing head (4) for printing the medium (2), a printing table (11), forming a support plane (12) for support of the medium (2) for printing, and, in said support plane (12), openings (13) of a vacuum device (14) are provided at least in some areas for holding the medium (2) during the printing process and a feed device (6) for the medium (2) for printing. Within the printing table (11), the medium (2) for printing is provided with at least one pressure device (16) at least in the region of a side edge facing the feed direction (7) with a pressure force acting perpendicularly relative to the support plane (12).
