Abstract (en)

[origin: WO2006126812A2] A washing or drying machine includes a main body; and a controller comprising an input unit, a main control unit for performing determining and controlling operations according to signals transmitted from the input unit, and a display unit for displaying a controlled state of the machine according to signals transmitted from the main control unit, wherein an upper input unit mounting structure is formed on the upper portion of the main body and a lower input unit mounting structure is formed on the lower portion of the main body, so that the input unit is detachably installed selectively on the upper or lower portion of the main body.
