Abstract (en)

[origin: WO2006125404A1] Disclosed is a method for adjusting an electric field device (1) in order to simplify operation thereof. Said method comprises the following steps: an electronic control unit (6) of the field device (1) identifies an external data storage module (5) that is connected to the field device (1); the electronic control unit (6) reads personal data allocated to a user of the data storage module (5) out of the external data storage module (5); the electronic control unit (6) makes adjustments on the field device (1) based on the personal data that has been read.
