Abstract (en)
[origin: WO2006122572A1] The invention relates to a method for transmitting contents of a continuous data stream from a first server to a terminal, whereby the contents are provided by a source and transmitted to the first server. An associated piece of information is provided by the source for each content item and the information which can be allocated to the contents of the transmitted data stream are transmitted to the terminal by means of another server.
