Abstract (en)
[origin: EP1884723A1] The structural unit (12) has two heating circuits that are provided for space heating and hot water generation, respectively, and housing components (20-23) that are made from plastic e.g. polyphenylene sulphide. A plate heat exchanger (6) is provided for domestic water heating, where the housing components form a conduit for the heat exchanger. The housing components are connected with one another based on connection pairs by using a snap-on connection, where one of the housing components comprises an insertion housing.
