Abstract (en)

[origin: WO2006129028A1] The invention concerns a device for fixing a protective element such as a nape flap or a shoulder flap (11) to a protective helmet (1), of the type comprising catching means (131,132,141,142,143) integral with the nape flap or shoulder flap (11) and support means (151,152,161,162,163) integral with the protective helmet (1) designed to co-operate with the catching means of the shoulder flap. The invention is characterized in that the co-operation achieved between the catching means and the support means is of the mechanical type and provided by interlocking.
